Members	Type of Issue	Issue # and Title	Status	Pull Request #	Notes/Summary
Openssf Team	doc	#3616: CI_Test evaluation documentation inconsistent with implementation	Merged	PR #4708	We edited the check.yaml file by adding a clear and concise description for the CI Test section.
Openssf Team	code	#3554: BUG: Dangerous-Workflow doesn't trigger on toJSON(github.event)	Dismissed	PR #4717	Work had been already done, but we still created a test case repository and added the example workflow to test the bug and it worked. We saw a pr was already created, so we dismissed the issue.
Openssf Team	doc	No Issue #: Capitalization and punctuation in CONTRIBUTING.md	Merged	PR #4714	We editied the CONTRIBUTING.md file by fixing any capalization errors, standardizing heading casing, and punctuation changes.
Jakiya, Denzel	doc	#4713: Signed Releases documentation unhelpful	Dismissed	NONE	This issue asked for a maintainers note for a document. After some research, we concluded that we couldn't provide the right solution and to let the maintainers fix the issue.
Jakiya, Denzel	code	#4315: Feature: Check custom CII Best Practices URL	Awaiting	PR #4744	The developer asked for a way to implement scorecard to use private urls along with the public urls in the CII Best Practices Badge App. We implemented the switch between public and private urls by adding an environment variable for the command line.
Jakiya, Denzel	doc	#3165: Feature: Improve docs on using package manager flags	Merged	PR #4732	This was a stale issue that we decided to work on. The READMe.md file was updated to reflect that the package ecosystem flags do not affect the final evaluation of Scorecard. Additionally, a note was added stating that --repo could not be used with the flags because it will produce an error.
Jakiya, Denzel	code	#4712: Contributors check isn't supporting --commit flag	Dismissed	NONE	We reworked the command the inital developer was using and believe that we fixed the issue, so we left a commit. However, Spencer closed the issue due to the error being intentional.
Jakiya, Denzel	doc	#2946: Feature: Improve error message when branch protection check fails because of the use of GITHUB_TOKEN	Awaiting	PR #4746	When you run Scorecard without putting in a PAT, you get an internal error. We added a clear and consice description in the CONTRIBUTING.md file that warning contributors to use the PAT and where to access the command for it.
